

## Security Cable Installation Instructions

### Step 1

Remove the screw from the face plate.

### Step 2

Place the small end of the cable (choker hole) in between the face plate and the screw.  
(Secure the screw tightly in the opening, as seen in the picture).

### Step 3

On the larger end (loop), place the loop between the flowmeter and the adapter.  
(Tighten the flowmeter to the adapter, as seen in the picture).

### Step 4

Attach flowmeter to the wall.
